THE COMPANY

Ferdinox s.r.l. is an Italian company born of the intuition of Mr. Ferdinando Esposito: welding specialist with thirty years of experience.

With the commitment of its young and efficient team, Ferdinox managed early on to establish itself in the tough entrepreneurial context of southern Italy, establishing and solidifying strategic partnerships with several prominent companies.

OUR SERVICES

Our mission is to lead companies and public entities on a path of growth steered toward technology and energy efficiency. Our job is to evaluate our clients' individual needs, offering our best solution.

Our work is tailored on the project, in early stages or its final state, whether it's construction or plant engineering, operating as general contractor with the possibility of global service handling.

MECHANICAL SYSTEMS

MAINTENANCE

CONSTRUCTION

ENERGY EFFICIENCY

MECHANICAL SYSTEMS

Thanks to decade-long experience, general-contractor jobs handling and a team of highly qualified technicians, Ferdinox offers his customers a strong “know-how” for the realization of turnkey high value-added technological system.

WATER TREATMENT

FOOD PROCESSING

FIRE PREVENTION

HEATING

AIR CONDITIONING

MAINTENANCE

Ferdinox s.r.l. puts itself forward as one-stop source for the handling of any structural and plant-related proceedings: set-up and design of high-tech systems, supporting top energy efficiency and cost effectiveness, in compliance with regulated standards of safety and quality, thus guaranteeing top comfort for the customer, while preserving the value of its assets.

Our team also specializes in routine and special maintenance with the possibility of it being handled by highly qualified personnel in the premises.

Special attention is given to preventive and predictive maintenance, in order to detect potential threats to the systems, via precise screening and census of the facilities, ensuring regulated mandatory maintenance, ordinary and extraordinary.
